

1. Manual class movement (cancel/add/update)
2. looks for schedule online(camper/instructor)
  - a. Print camper schedule (camper/instructor)
3. Add class details(admin/instructor)
4. Obtaining class roster(instructor)
5. Rank class titles (camper)-- done in class
6. Run ranking process (admin) --done in class
7. Lock rankings (admin)
8. Set enrollment cap for classes (admin)
9. User logs in (admin/instructor/camper)

Questions:

- can administrators override class capacity (say they want to add an additional camper to a full class)?
- Should admins be able to do 2-2a, not explicitly stated in write up but seemingly they should have 'god' rights and be able to do pretty much anything.
